SUMMARY

Staff Frontend Engineer with 7+ years of experience building scalable enterprise React applications for McKinsey, Carrier Global, and Singtel. Deep expertise in TypeScript, Redux Saga, Node.js, and high-performance component architecture. Proven record of driving clean architecture, achieving 80%+ test coverage with Jest, and mentoring engineering teams. Actively integrating AI workflows (RAG, OpenAI APIs) into robust frontend systems.

EXPERIENCE

Nagarro

Staff Engineer

Hyderabad, Bengaluru

March 2023 - Present

- Promoted from Associate Staff Engineer to Staff Engineer, owning frontend architecture, technical direction, and code quality across enterprise client platforms.
- Engineered scalable React applications and reusable UI component libraries powering enterprise financial workflows for McKinsey & Company and IoT platforms for Carrier Global.
- Developed Node.js REST APIs and managed complex asynchronous business workflows using Redux Saga and GraphQL.
- Maintained ~80% unit test coverage using Jest and optimized application performance, reducing component re-renders and improving responsiveness.
- Integrated Large Language Models (LLMs) and AI-enabled workflows into enterprise applications, enhancing user experiences.
- Mentored engineers, reviewed pull requests, enforced coding standards, and collaborated with cross-functional Agile teams through critical release milestones.
- Engineered and optimized application architecture for enterprise platforms, leveraging React, Node.js, and GraphQL to ensure scalability and support increased concurrent users.
- Directed code review processes for weekly pull requests across enterprise client deployments using GitHub and Bitbucket to maintain high code quality standards.
- Provided critical production and release support during critical enterprise deployment cycles using React DevTools and Node.js debugging tools.

Accenture

Application Development Analyst

Kolkata, Bengaluru

June 2021 - March 2023

- Built responsive customer self-service and appointment booking applications for Singtel across Singapore using React and modular UI components.
- Optimized frontend performance by reducing unnecessary component re-renders and implementing responsive user interfaces across devices.
- Integrated REST APIs for seamless communication between frontend applications and backend services.
- Collaborated with cross-functional Agile teams, UX designers, and stakeholders through sprint planning, code reviews, and production support.
- Ensured high-quality software deliverables by conducting code audits, implementing automated testing frameworks (Jest, Cypress), and consistently achieving bug rates below 1% per sprint over 12 months within Singtel Agile projects.

Almawiz

Product Engineer-I

Bengaluru

December 2020 - April 2021

- Implemented secure payment gateway integrations and configurable frontend and backend features for multi-channel conversational commerce platforms.
- Integrated chatbots with Facebook Messenger using custom webviews to expand customer engagement across social platforms.
- Built and consumed REST APIs to facilitate communication between frontend interfaces and backend services.
- Engineered client-facing modules using React and Node.js, improving service responsiveness and multi-channel conversational commerce capabilities during tenure.
- Resolved high-priority technical issues using Jira and Postman to ensure reliable performance across conversational commerce modules.

MetricStream

Member of Technical Staff

Bengaluru, Karnataka

September 2018 - August 2020

- Customized enterprise Governance, Risk, and Compliance (GRC) platform modules for Western Digital and ICW based on complex client requirements.
- Developed JavaScript and Node.js solutions supporting configurable workflows across enterprise GRC applications.
- Integrated third-party enterprise services including Dun & Bradstreet and Dow Jones to enhance business intelligence and due diligence capabilities.
- Provided critical production support during annual business cycles and participated in frontend engineering interview screening rounds.
- Conducted comprehensive code review processes for all major releases over 2 years, utilizing Git, Bitbucket, and SonarQube to improve code quality, reduce defect rates by 30%, and uphold enterprise-standard security protocols across team deliverables.
- Engineered and maintained scalable Web Applications over a 24-month period, leveraging React.js and RESTful APIs to support client-specific workflows, resulting in a 25% increase in deployment efficiency and enhanced user adoption for enterprise GRC solutions.

SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Redux, Redux Saga, HTML5, CSS3, Material UI, Storybook, Component Architecture, Performance Optimization, Responsive Design, Accessibility (WCAG), Ember.js (learning)
Backend: Node.js, Express.js, REST APIs, API Integration, GraphQL
Testing: Jest, React Testing Library, Unit Testing, Test Automation
Cloud & DevOps: AWS, CI/CD Pipelines, CircleCI
Databases: MongoDB, DynamoDB, SQL, Oracle
Developer Tools: Git, GitHub, VS Code, Postman, Figma, Cursor AI, DBeaver
AI & Emerging: Generative AI, RAG, Prompt Engineering, OpenAI APIs, LLM-powered Applications, AI-assisted Development

PROJECT

AI Knowledge Assistant (Retrieval-Augmented Generation)

- Designed and implemented an end-to-end RAG pipeline for document ingestion, embedding generation, semantic retrieval, and conversational querying.
- Built a React-based interface allowing users to upload knowledge sources and interact with documents through natural language conversations.
- Developed backend services using Node.js to process uploaded documents and orchestrate AI workflows; integrated OpenAI APIs for grounded responses.
- Implemented embedding-based retrieval and prompt engineering techniques to improve response quality and reduce hallucinations.

EDUCATION

B.Tech in Information Technology

RCC Institute of Information Technology

- MAKAUT formerly known as WBUT | DGPA: 8.09

2014 – 2018

AISSCE & AISSE

Kendriya Vidyalaya A.F.S. Bagdogra

- CBSE | Class XII: 81.6% | Class X: 9.4 CGPA

2011 – 2013

CERTIFICATIONS

- Frontend Development Specialization
- Backend Development Specialization
- Complete Generative AI Course: RAG, AI Agents & Deployment

AWARDS & HONORS

- Multiple Quarterly Recognition Awards — Nagarro
- Recognized for supporting both frontend and backend development.
